This nearly limitless trail will offer rides geared to your abilities. The Montour trail is a crushed gravel trail that has fairly slight grades. Ride will start at 6:00 p.m. and the first portion will typically head north towards Coraopolis and then back again. This will be approximately 12 miles before we head south, out toward the tunnel. By backtracking like this, you have the chance to either wait for the group (if you are running late) or cut the ride short. Total ride will be at least 20 miles of serene countryside. Afterwards we will select a nearby restaurant to visit for food and refreshments. Call it après biking. For more information about the Montour Trail Ride, please call Jörg Machatzke, or send him an [e-mail](#).
